

Dear Windows Vista-x64/ Windows 7-x64 users,

The blue Jump-Track 3.2 package (Blue CD-ROM) supports Vista-x64/ Windows 7-x64.

The old red Jump-Track 3.0 package (Red CD-ROM) does NOT support Vista-x64/ Windows 7-x64.

When ordering from a dealer, make sure you order the Jump-Track 3.2 package.

When ordering online from L&B you will always receive the latest updated package.

If you want to upgrade from Jump-Track 3.0 to Jump-Track 3.2 follow the steps below.

1)

Contact Larsen & Brusgaard to receive an USB-Track interface unit that supports x64.

The USB-Track interface that is included with the Jump-Track 3.0 CD-ROM (Red CD-ROM) will not work

2)

The following software is required:

www.L-and-B.dk/jumptrackv3/JumpTrack_3_2.zip

PLEASE NOTE THAT JUMP-TRACK V3.0 MUST BE INSTALLED BEFORE UPDATING TO V3.2

2.1)

Download the zip file into an empty directory

2.2)

Unzip the 3 files

Jumptrack.exe

AltiTrack_Communicator.exe

AltiTrack_Firmware_Programmer.exe

2.3)

Replace

..\Program Files\Jump-Track 3\Jumptrack.exe

with the new Jumptrack.exe

When running verify that it's version 3.20.x

Replace

..\Program Files\Jump-Track 3\Tools\Alti-Track Communicator\AltiTrack_Communicator.exe

with the new AltiTrack_Communicator.exe

When running verify that it's version 3.20.x

Replace

..\Program Files\Jump-Track 3\Tools\Alti-Track Firmware Programmer\ AltiTrack_Firmware_Programmer.exe

with the new AltiTrack_Firmware_Programmer.exe

When running verify that it's version 3.20.x

3.1)

Download the verified Vista x64 drivers from the following link:

http://www.l-and-b.dk/downloads/drivers/2_04_06_WHQL_Certified.zip

and unzip to a temp. folder on desktop

3.2)

Connect the x64 compatible USB device. Drivers are now installed automatic, if not then use "Device Manager" for manual install.

3.3)

Delete temp. folder

3.4)

Enjoy
